

## SKIN AFFECTIONS ARE OFTEN CONTAGIOUS

How to Prevent Them.

The skin and its millions of pores are open to every form of contagion, from the accidental cut, sore, scald or burn, or the appearance of boils, carbuncles or fells, to the more serious diseases of the skin. It is not necessary to more than suggest that every family and every one, carry, ready for immediate use, the world's great standard skin remedy—Resinol Ointment. This ointment, indorsed and recommended by thousands of physicians, nurses and experts, remains the standard of standards. It is scientifically compounded from natural ingredients, each one, and all together, particularly adapted to the skin. It is put up in screw-top opal containers, selling for fifty cents and a dollar, according to size. Resinol Ointment is as easy to apply as cold cream. It is utterly impossible for it to harm the most delicate skin, for it contains only the highest grade of remedial agents, without even a trace of mercury or lead, or any other poison. The ointment is sold by all druggists. Sample sent free if you will mention Department No. 51. Resinol Chemical Co., Baltimore, Md.

### AN EXPLANATION.

Sambo—Say, granmammy, what makes de moon shine so bright some times, while some nights is so dark? Granmammy—Well, chile, I reckon dat de good Lawd made dem dark nights so dat poor colored folks kin have chikens 'thout de formality ob payin' foh 'em.

### GIVEN UP TO DIE.

Cured By Doan's Kidney Pills After Doctors Gave Up Hope.

J. L. Richardson, Red Key, Ind., says: "For five months I was confined to my bed, a helpless invalid. I almost went crazy. Twenty-five hours passed without a passage of the urine. The doctors began to take the water from me with a catheter. They did this once a day for fifty days. Finally my doctor told me my time was up. The next day a friend advised me to take Doan's Kidney Pills. When I had used five boxes, I got out of bed and improved until entirely well. For five years I have not had the slightest trouble." "When Your Back Is Lame, Remember the Name—DOAN'S." 50c. a box at all stores. Foster-Milburn Co., Buffalo, N. Y.

Is of Scotch Origin. Ellen Key, who has written a number of books and has had much to do with molding public opinion in Sweden, is descended from a Scotch Highlander, Colonel McKay, who fought under Gustavus Adolphus, in 1630 her father lost all his money, and Miss Key went to work as a teacher. She then gave lectures and has for 20 years been lecturer on the history of civilization at the Popular University of Stockholm.

They're All About Tailors. "All criticism," said Professor Brander Matthews in one of his brilliant Columbia lectures, "is to a certain extent, personal and biased." He passed and smiled. "The Tailor and Cutter, a weekly paper," he resumed, "said in a recent leading article: 'Carlyle's "Sartor Resartus," Meredith's "Evan Harrington" and Kingsley's "Alton Locke" will be great classics when the ephemeral novels of today will have long since perished.'"

Association of Ideas. "You have a great many flies and mosquitoes," said the rather supercilious girl. "Yep," replied Farmer Cortosel. "I didn't like to mention it, but I've noticed every year that flies, mosquitoes and summer boarders all appear to be on hand at the same time."

His Longings. "What did you lose on that wrestling match?" "About nine-tenths of my respect for the human race."

Sometimes a girl gets confidential and tells a man that a lot of other men have tried to kiss her, but he is the only one who succeeded.

Accidents, Burns, Scalds, Sprains, Bruises, Bumps, Cuts, Wounds, all are painful. Hamlin's Wizard Oil draws out the inflammation and gives instant relief. Don't wait for the accident. Buy it now.

Serious Business. Madge—Was George fooling while you were playing golf? Marjorie—Gracious, I hope not? Why I accepted him.—Lippincott's.

You may have noticed how different men are from hogs. The latter never want to do things that are not good to them.

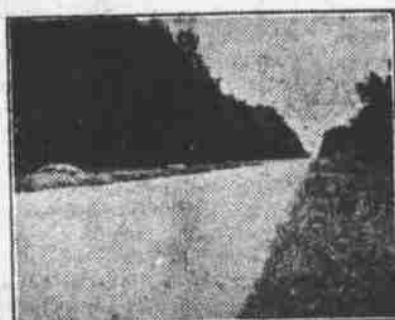

The spoke of the wheel which creaks most, doth not bear the greatest burden in the cart.—Thomas Fuller.

All the world's a stage, and all the men and women are merely players.

## EUROPE IS FAR AHEAD OF THE UNITED STATES IN GOOD ROADS

European Highways Are Excellent Object Lessons of Durability and Maintenance—Roman Roads Are Over 2,000 Years Old—Getting Crops to Market Is Important.

Much is being written of methods for increasing crop production but unless we spend some time thinking about getting crops to market we have only gone part way on the road to the economical feeding and clothing of the race.

A French Road With Repair Material Piled Along the Roadside.

In the matter of country roads our neighbors on the other side of the "pond" have us beaten a long way. Of course they have more experience than we, for some of the Roman roads are still in use and these have been built for more than two thousand years.

### VENTILATION IS ESSENTIAL TO HEALTH

Air in houses may be polluted by the gases breathed from our lungs and that escaping from leaky stoves. Air contains enormous numbers of dust particles. The average city air is estimated to contain three million dust particles to the cubic inch. Country air contains two thousand dust particles to the cubic inch. The air indoors contains ten times as many dust particles as the air out-of-doors. With the dust, of course, are mingled the small dust plants with probable germs of disease. Ventilation is the replacing of the impure air of a room, or other enclosed space, with proper air from out-of-doors.

#### Need of Pure Air.

Inasmuch as the adult human body requires for regular use about five hundred cubic inches of air every minute, the air in the immediate vicinity of the nose is quickly used up and an equal amount of impure air is breathed out of the lungs. It is therefore necessary that pure air from out-of-doors be constantly pouring into our rooms and the impure air passing out. One can not do his best work if he is breathing impure air. One is more susceptible to disease if he breathes impure air, because his body is not strong enough to resist the disease germs when they are once admitted into the body. Disease germs which grow in the interior of our bodies also flourish best in a small supply of air. The proof that people are injured by breathing impure air, has been obtained by comparing statistics for a certain number of years gathered among men living in unventilated, and those living in well ventilated places.

#### Methods of Ventilating.

Air does not move of its own accord. In our houses we best create a circulation of air by having two windows open, one for the impure air to pass out, another for pure air to enter.

#### HELPFUL HINTS FOR HOUSEKEEPERS.

Ink stains can be removed by washing in sweet milk. An old bath towel makes an excellent mop cloth. The spatula or palette-knife is quite a useful utensil in the kitchen, having a broad, dull-edged blade made of very flexible steel. It will be found useful in many ways. Jams and butters may be made from pulp left from jelly making or from knarled or imperfect fruit. A cheap and serviceable fruit cupboard can be made out of the boxes that mason jars come in. These boxes can be placed on their sides, one above the other, in the cellar, and the fruit placed in them. A piece of black builders' paper makes a convenient cover to shut out the light.

Arrangements have been made with the professors of the College of Agriculture, Ohio State University, whereby inquiries on farm subjects will be answered in these columns. Any reader wanting information along agricultural lines can obtain same by writing the Extension Department, College of Agriculture, Columbus, Ohio. Enclose two-cent stamp if immediate reply by mail is desired.

#### Measuring Lumber.

The diagram and calculation by which you show that a log six inches in diameter and ten feet long would yield 13 1-3 feet of board measure is quite correct. By applying the Doyle rule the result is 2 1/2 feet board measure as stated in a previous issue. Satisfactory log rules are difficult to construct, and the Doyle rule, which is most widely used in Canada is especially at fault in the measuring of small logs as the above figures show.

Some of the French roads would certainly be a delight to the man with the automobile and you couldn't blame him if he sometimes exceeded the speed limit. In the more level sections of England the bicycle is used more than it ever was here even in the days when everybody wanted "bikes" instead of "autos" as now. In this way the good roads mean much to people of limited means.

What can we learn about road maintenance from European roads? First, that it pays to build well for the foundations of these old roads are deep; second, that eternal vigilance is the price of good roads as well as some other things. All along the highways is found material for repair so that holes don't get to be big enough to bury a horse before they are filled. If it pays a railroad to keep up its road-bed all the time, there is no reason why our wagon roads may not be economically maintained in the same way instead of the usual spasms of repair and neglect.

O. M. JOHNSON, College of Agriculture, Ohio State University.

One window open, however, will serve as two. Ventilating should be done in such a way as not to cool the room too much; for this reason, the window is best lowered from the top, in order that the air may be heated before mingling with the air in the lower part of the room. The lower sash may be raised and a loosely fitted board inserted; fresh air then enters through the space between the upper and lower sash and is directed upward, thus avoiding direct draft.

Fresh Air May Be Brought Into a Room by Lowering the Window Sash From the Top and Raising the Lower Sash and Inserting a Loosely-fitted Board. An Open Stove or Grate Helps Get Rid of Impure Air.

It is better to have a window open all the time than to air the room only occasionally. There should be a constant removal of impure air and a fresh supply of pure air. An open stove or fireplace is a reliable means of getting rid of impure air.

Air is of even greater importance at night than it is during the day. The body recuperates mostly at night during sleep; then large amounts of oxygen are required, so there should be plenty of fresh air at night. The sleeper may be protected from drafts by a screen or chair between the window and the bed.

ELIZABETH JEFFERSON, College of Agriculture, Ohio State University.

#### A FEW AUTUMN SUGGESTIONS.

Plan to attend the farmers' short course at the College of Agriculture this winter. Get in the fuel supply before winter sets in. Clean up all the trash that has accumulated around the place during the summer season. Some of it will make good firewood and insect pests will be deprived of their winter home. See that all farming implements are under shelter, repaired and oiled. Provide plenty of good reading for the winter months. Attend all farmers' meetings held in your county. Study your business and try to improve. Get the tables ready for the live stock. It pays to keep them comfortable during the winter. Get rid of surplus stock before winter feeding begins. See that next spring's supply of seed corn is properly cured and stored. Look out for hog cholera. Cleanliness about the food and water supply will do much to prevent this trouble. A little shredded fodder will help out the hay supply. A little time put on the roads now may prevent a bad mud hole next spring. The split log drag can be used to advantage. The straw pile can be used for bedding for the stock. But, after leaving it stand out in the weather.

The Scribner rule is more nearly accurate for small logs. For a log six inches in diameter and 12 feet long, the Doyle rule accords 13 feet board measure and the Scribner rule 14 feet, while the actual amount that may be sawed out is 16 feet. In the measurement of logs 20 to 20 inches in diameter the results from the application of the two rules do not differ materially. Logs more than 30 inches in diameter will show a higher yield by the Doyle than by the Scribner rule.

## Ohio Happenings

Upper Sandusky.—A two-story building, owned by L. H. Pauley of Kirby, was destroyed by fire. It was occupied by a blacksmith and workshop and contained considerable machinery. The loss was more than \$1000, with partial insurance.

Oxford.—Lucille Osborne, aged 16, daughter of Mrs. Maggie Osborne, a widow, shot herself in the right breast. She is a high school student and it is believed a youthful love affair is responsible for her act. Her condition is critical.

Marysville.—Mrs. Joseph Miller placed strychnine on pieces of bread under the cupboard to kill mice and her little daughter, Virginia, aged 2, ate a portion of the bread. There is little hope for the child's recovery.

Findlay.—More than half of the pupils of the Detweiler school in this city have been quarantined because of an epidemic of scarlet fever, and the schools have been closed. The Orphans' Home, where two cases are confined, is under quarantine.

Findlay.—Word came here of the death at Las Vegas, N. M., of Merle Myers, a young man of this city, who went south for his health a few weeks ago.

Ottawa.—The foundation for the Ottawa Sugar factory is to be pushed Nov. 10, and the steel work is to be completed by Jan. 1. Work on the former is progressing rapidly, the steel is being shipped, and the machinery will arrive late in January.

Wapakoneta.—George Stringham, aged 17, while sitting with other boys at the kitchen table in his home in this city, was accidentally shot and seriously wounded by John Harroff, one of the boys. The boys had been tampering with the gun, which they thought was not loaded.

Martins Ferry.—John Haig, while hunting groundhogs, shot off most of his left hand when his gun was accidentally discharged as he was crossing a fence.

Lorain.—The heavy apple crop has enabled one cider mill near here to turn out 2,500 gallons of cider a day. That record is expected to be maintained for two months.

Cincinnati.—The charge against President T. C. McClure of the suspended Metropolitan Bank and Trust Company of having received deposits contrary to law was formally presented to the grand jury for investigation by Common Pleas Judge Dixon. The court's part in the matter, however, was entirely formal and as required by law, McClure having been bound over to the grand jury by Squire Stratton. It is presumed that the grand jury investigation will be started some time next week.

Painesville.—Farmers living in school district number six, Painesville township, have started an opposition school in the residence of D. A. Wagar because the board of education closed their school and tried to compel them to send their scholars into another district. The farmers claim they have been discriminated against. The board of education says the school was closed for lack of attendance and teachers.

Cincinnati.—Morris Levine will serve 18 months in the Leavenworth federal prison for his partner, Charles Rosen, so that Rosen can support his wife and two children.

Zanesville.—When a skiff which they had entered in an attempt to row across the Muskingum river at Cedar Rock sprung a leak and began to sink, Iona Berry and Goldie Agin, aged 16 and 17, became panic-stricken and faint. Ethel Bell and Nettie Maddox, on the bank, saw their predicament and succeeded in throwing a rope over the end of the sinking boat and dragging it to shore.

Barnesville.—The death of Harry E. Demaree, editor of the Barnesville Republican, occurred in a Wheeling hospital, after an operation for enlargement of the liver. He was 45 years old.

Akron.—In a collision between two large traction cars on the East Market Street line William Pfeiffer, a motorman, was badly injured. The Jensen prevented Pfeiffer seeing the car in front of him.

Marysville.—A serious explosion occurred here when the carbide tank at Kimmel & Rausch's garage let loose. All of the window glass and frames were blown out of the rear of the building and glass was also blown out of residences near by. The partition separating the large room from the repair room was blown down. The workmen anticipated the explosion and all were either out of the building or in the front part and escaped death.

Steubenville.—The trial of Stani and John Wisniewski for stabbing Walter and Peter Klovits to death near Adena six months ago developed that the spot of the murder is marked in a unique way. Rev. Father Wiercinski has set up there a white cross inscribed, "Thou shalt not kill," thus keeping, he says, the divine warning before any who wander that way, near the forks of the two roads.

Toledo.—Within a few minutes after he had selected the text of the sermon to be preached at his funeral, Rev. J. W. Harwood, pastor of the United Brethren church at Oakwood, passed away.

Columbus.—Three Italian laborers were killed and ten others seriously injured in a collision between a Pennsylvania work train and a freight at Sperry's curve, west of this city. The work train, with 24 Italian laborers on board, was moving slowly when the freight train, at a speed of probably 35 miles an hour, ran into it from the rear, telescoping the work car.

Steubenville.—After seven years of litigation the supreme court has finally affirmed the decision of the lower courts and Referee W. McD. Miller to the effect that the directors of the defunct First National Bank of Mount Pleasant, O., were not liable for losses sustained in 35 bad loans, aggregating \$100,000 loss to the bank.

Painesville.—The body of H. Laputara of Ashtabula, formerly of this city, was found beside the Lake Shore tracks at Perry. As no train had run over the body, Coroner M. P. Carmody believes the man fell off a train or, in trying to get on, struck a pile of ties.

## M'NAMARA IS VICTOR

TALESMAN NELSON EXCUSED AFTER FOUR-DAY FIGHT.

Admits He Had Formed Opinion Which Would Take Strong Evidence to Change.

Los Angeles.—The four days' fight against Z. T. Nelson, a venetian, as a juror in the trial of James B. McNamara, who, with his brother, is accused of having blown up the Los Angeles Times building, ended with a victory for McNamara.

Nelson was dismissed after the state had withdrawn its objection to a challenge for cause, and after Nelson had admitted that he had formed an opinion of the guilt or innocence of the prisoner and that it "would take mighty strong evidence to shake him."

Judge Bordwell questioned Nelson and he admitted he had obtained information about the alleged dynamiting of the Times building from persons with whom he had talked and from newspapers.

"If you were chosen as a juror in this case could you and would you, notwithstanding the opinion you have formed, act impartially on the evidence submitted to you?" Judge Bordwell asked.

"It would take pretty strong evidence before I would," was the reply. A wrangle between lawyers as to whether he should have answered yes or no followed and Nelson said he could not answer the question. The state then withdrew its objection and Judge Bordwell permitted Nelson to step out. Thus ended the first skirmish in the trial.

McNamara was silent throughout the sessions. He maintained a strong interest in the examination of the talesmen, but offered no suggestions.

### ALDRICH HAS REVISED PLAN

New Scheme Provides for a \$300,000,000 Reserve Association With United States in Control.

Washington.—A National Reserve association with a capital of approximately \$300,000,000, which is estimated to be about 20 per cent of the capital of all national and state banks and trust companies in the United States eligible for membership, is provided in the revised plan of currency reform, drafted by former United States Senator Aldrich, chairman of the National Monetary commission, has been made public.

The revised plan, which will be submitted to the monetary commission here next month, contains the principal features of the original draft with suggestions as to the relations of state banks and trust companies to the association; a method of purchasing two per cent government bonds now held by national banks and means to insure the maintenance of adequate reserves by the association and to regulate discounts and note issues.

### ROOSEVELT SILENT IN 1912

Letter Indicates that the Colonel Will Keep Out of Next Presidential Campaign.

Richmond, Va.—The part which former President Roosevelt will take in the coming national campaign probably will be one of silence. This became publicly known through a letter which he wrote to Congressman J. Hampton Moore of Pennsylvania, president of the Atlantic Deepwater Ways association, declining an invitation to address the convention. Colonel Roosevelt emphatically declared: "From now on I wish to avoid making any speech I possibly can avoid."

It is interpreted to mean that Mr. Roosevelt wished to refrain from giving utterance to any opinions which possibly might be misconstrued in connection with the presidential campaign.

### WILSON GREETS BREWERS

Secretary Delivers Speech of Welcome at International Congress Despite Hundreds of Protests.

Chicago.—Secretary of Agriculture James Wilson braved the accumulated wrath of prohibition workers and the prayers of church people throughout the country, and delivered his speech at the international brewers' congress here.

In spite of hundreds of protests that had been sent to President Taft and to the secretary himself, calling on him to refuse to appear at the congress, Mr. Wilson welcomed the members of the organization and made his speech. To the nonexpert auditor it consisted merely in assuring the international visitors the same courtesy the United States has received from the European countries from which some of them come.

### Edison Wins Nobel Prize.

Stockholm.—A Nobel prize is to be conferred upon Thomas Edison, the famous American inventor, for his scientific achievements.

Deneen Has Another Fall. Springfield, Ill.—Governor Deneen suffered a second fall within twenty-four hours and suffered another injury to his broken leg. While entering the bathroom at the mansion the governor fell. Physicians were called and examination revealed the fact that the leg was not broken.

### American Killed in Honduras.

New Orleans.—A dispatch from Ceiba, Honduras, says Lot Thomlinson, an American, was killed in a revolver fight with a native.

### Walks From Coast to Coast.

San Francisco.—Henry Hons, a pedestrian, has completed a coast-to-coast walk, having journeyed from Jersey City to San Francisco in seventy-one days. Hons did not steal, solicit nor work during his trip, using his savings of several months' work as a laborer to defray his expenses.

### Sleeping Family Is Slain.

Ellsworth, Kan.—William Shawman, his wife and three children were found dead in their beds, slain with an ax.

## Buckeye Notes

Kent.—C. O. Judd's barn, the finest in this section, with all its contents, three valuable English horses and twenty head of sheep, was burned in Streetboro township. The loss is \$10,000.

Zanesville.—William Williams, 36, brakeman, was instantly killed when two engines collided head-on in a dense fog in the yards.

Mt. Vernon.—Recent strikes in and about Gambler have started a Knox county gas boom. A big well has been struck in Gambler on the Thompson tract. Three more wells will soon be completed. The Knox county field was seemingly exhausted so far as new territory was concerned six months ago. Now it is said there is gas under the Kenyon college campus.

Bridgeport.—Mrs. Sarah Beaver, 70, of West Wheeling, was instantly killed by a freight train while walking along the C. & P. railroad tracks. She was almost deaf and did not hear the train approaching.

Bridgeport.—A guilty conscience caused Peter Mentz, florist, to go to Sheriff William Clemens at Wheeling, and confess that he had two wives. He was married 20 years ago to Sadie Hammer of this city, and deserted her and two children in Pittsburgh four years ago, after which he married Annie Schallenberg of Wheeling. The second wife, who has three children from the marriage, last week fled suit for divorce and Mentz after worrying over this made his confession. A charge of bigamy has been filed against him.

Bridgeport.—Miss Hazel France, only daughter of John France, B. & O. passenger agent at Blaine, eloped to Cleveland with John Thompson of Barton. The parents were willing.

Brinkhaven.—Council decided to allow street lamps to burn incessantly as it is cheaper than to hire them extinguished. Each lamp costs 25 cents per month.

Loudonville.—The Perryville schools, condemned as unsafe and closed, will reopen soon following the failure of two bond elections for a new school.

Wapakoneta.—After losing his month's salary playing a chewing gum slot machine, in Shnell's saloon, Wilhelm Reichert, a native of Germany, decided to get even and entered the saloon and stole the machine, money and all. He was arrested.

Upper Sandusky.—Albert Agter, 22, disappeared from Lovell, a week ago, after taking headache powders. He was found in a corn crib on the Moser farm, in a dazed condition. He can give no explanation.

Bellefontaine.—William Pleasant of Gettysburg was attacked by a vicious bull in a pasture field and was so badly gored that he will die. He is 70 years old and a retired farmer.

Chillicothe.—Three children, Morris Meyers, Estie Holden and Harriet Renick, living near Good Hope, south of here, are in a serious condition as the result of wounds inflicted by a rabid dog belonging to Dr. S. C. Barr, of this city. Small hope is held out for the recovery of the Renick girl who was bitten on the head, across the nose and under each eye.

Cleveland.—Mrs. Emma Von Drank, a passenger on the steamer City of Detroit, awoke to find her 2-month-old baby boy had smothered to death by her side in the berth, during the night. She is prostrated.

Chillicothe.—John Miller, aged 55, a Spanish-American war veteran, was found dead in the park lake. He had been missing since last Thursday. The supposition is he was sitting on the bank and rolled in.

Akron.—The body of Charles Cheslock, aged 19, who was drowned two weeks ago while attempting to rescue a pig from the Cuyahoga river at Boston Mills, has been found on an island a mile below the point where he went down. The body of Cheslock's companion, who was drowned at the same time and in the same manner, has not been recovered.

Cincinnati.—Bradley Brock, aged 16, is detained by the police to answer a charge of shooting to kill. According to the officer who arrested him, Brock admitted shooting Arthur Frizzell. Frizzell and Brock, it is said, were old-time enemies. Frizzell was pursuing Brock along the street when shot. The bullet penetrated the lung and is believed to be serious.

Toledo.—A freight train on the Sandusky division of the Big Four crashed into the rear of a gravel train in front of the depot at West Liberty. Fireman Harry Vermillion of Springfield was crushed to death.

Washington, C. H.—Dr. V. P. Smith of this city, veterinarian, declares that hog cholera is spread throughout the country by the haphazard use of the serum and virus furnished by the state. Cholera has killed hogs by the hundreds throughout the state. Dr. Smith declares that the vaccination of the hogs serves to spread the disease among hogs which are not already affected, and in this way hog cholera has been increasing.

Zanesville.—Mrs. Lovell Bates, of Powells Mills, is unconscious at her home as a result of the recent arrest of her husband on complaint of a neighbor. She had been ill and now her condition borders on dementia. She wandered from her home one night and was found unconscious next day on neighbors, having fallen exhausted while walking along Jonathan Creek.

Massillon.—Mrs. Hattie A. Weaver has asked the police to help her find a woman of her acquaintance, who, she says, entered her house in her absence and stole the sheets from her bed.

Columbus.—George M. Whitaker of Washington, D. C., was elected president of the Farmers' National congress.

Sandusky.—Eli Betteridge and John Gasperd, Italians, left the Erie county jail, declaring that America is surely a "funny country." Each had received \$120, having been incarcerated 120 days as witnesses in the case of Albert Kaiser, a saloonist, whose trial on a charge of manslaughter has been concluded. "We getta rich being in jail," said Gasperd in broken English as Treasurer Conrad Nuhn passed the cash over the counter.

## Cement Talk No. 10

Concrete work stands the weather. No rotting, shrinking, warping, no crumbling nor rusting can occur where good sand, gravel or crushed stone have been mixed properly with UNIVERSAL Portland Cement and cast into sidewalks, floors, steps, foundations or other concrete work. Our best customers who know by experience that concrete made from UNIVERSAL cement is good for years of use. Ask your dealer for UNIVERSAL when you have any concrete work to do.

UNIVERSAL PORTLAND CEMENT CO. CHICAGO-PITTSBURGH ANNUAL OUTPUT 10,000,000 BARRELS

### CONTINUOUS PERFORMANCE.

Poet—In winter I write poems to keep the wolf from the door. Admiring Friend—Yes—Poet—And in summer I have to keep on writing poems so the ice man will stop at the door.

Daniel Fahrenheit. In view of the abnormal weather which we have had this summer we think a tribute of respect should be paid to the memory of Gabriel Daniel Fahrenheit, who was born on September 16, either in 1736 or 1740, it is hard to say which. Before his day several attempts had been made to measure the heat level, not the heat, by tubes containing oil of spirits of wine, but it lay with a bankrupt merchant of Danzig to show how the feat could be successfully accomplished.

The first thermometers were made with spirits of wine; but the ingenious Gabriel soon adopted mercury as his medium, and so it has remained to this day. His instruments speedily became known throughout the world, and though a more rational method of graduation has since been adopted, the popular mind still clings to the Fahrenheit scale. Our own Royal society thought highly of this humble inventor and acknowledged his genius by making him one of its fellows. To the "Transactions" of the society he contributed several papers.—Pall Mall Gazette.

Sometimes Not at Home. Charity Worker—You poor soul! Does your husband always hang around the house all day? Mrs. Tenement (cheerfully)—Indeed, no. Half the time he's in the lockup.—Tit-Bits.

Not in Vain. Noah sighted Mount Ararat. "At last," he cried, "the mountain resort with an ocean view!" Herewith he felt the voyage was not in vain.—Puck.
